Electronic draughts boards
for home or tournament use

Product highlights

The beautiful Walnut draughts e-Board is a unique example of DGT technology and innovation. The board is equipped with a serial port and a large number of boards can be connected together for a tournament set-up and live broadcasting of games over the internet. Tournament software is included.

Electronic draughts pieces are supplied in a custom made wooden box. The DGT 3000 chess clock connects to the board. Free software is available that allows the boards to communicate with most existing draughts software.
